Average trajectory jaccard similarity with profiles

Average trajectory jaccard similarity with profiles

P: '(0.0, 0.25, 0.75)'
Last: 0.96

Training Iteration

Mean absolute difference in visitation counts by profile

Mean absolute difference in visitation counts

P: (0.0, 0.25, 0.75)
Last: 1.58).

Training Iteration

Expected trajectory profiled cost similarity per iteration

Expected trajectory profiled cost similarity

P: (0.0, 0.25, 0.75)
Last: 1.00).

Training Iteration

Best overlap proportion with (0.0, 0.25, 0.75) agent per OD

Best overlap proportion with an expert trajectory

Worst Overlap: 0.13
(at [376 542]).
Overlap Proportion: 0.94

OD pairs
