Average trajectory jaccard similarity with profiles

Average trajectory jaccard similarity (y-axis) vs Training Iteration (x-axis)

P: '(0.0, 0.6, 0.4)'
Last: 1.00

Expected visitation count difference per profile

Expected absolute difference in visitation counts (y-axis) vs Training Iteration (x-axis)

P: (0.0, 0.6, 0.4)
Last iter: 0.00).

Expected profiled cost similarity per profile

Expected trajectory profiled cost similarity (y-axis) vs Training Iteration (x-axis)

P: (0.0, 0.6, 0.4)
Last iter: 1.00).

Best overlap proportion with (0.0, 0.6, 0.4) agent per OD

Best overlap proportion with an expert trajectory (y-axis) vs OD pairs (x-axis)

Worst Overlap: 1.00
(at [427 329]).
Overlap Proportion: 1.00
