Average trajectory jaccard similarity with profiles

Average trajectory jaccard similarity with profiles (y-axis) vs Training Iteration (x-axis)

P: '(0.25, 0.25, 0.5)'
Last: 1.00

Mean absolute difference in visitation counts by profile

Mean absolute difference in visitation counts (y-axis) vs Training Iteration (x-axis)

P: (0.25, 0.25, 0.5)
Last: 0.00).

Expected trajectory profiled cost similarity per iteration

Expected trajectory profiled cost similarity (y-axis) vs Training Iteration (x-axis)

P: (0.25, 0.25, 0.5)
Last: 1.00).

Best overlap proportion with (0.25, 0.25, 0.5) agent per OD

Best overlap proportion with an expert trajectory (y-axis) vs OD pairs (x-axis)

Worst Overlap: 1.00
(at [437 518]).
Overlap Proportion: 1.00
